My New Creation With ~~hand~~

# Agenda

- 1.problem statement
- 2.project overview
3. End user
- 4.Tools and technologies
- 5.portfolio design and layout
- 6.Featured and functionality
- 7.Result and screenshots
- 8.Conclusion
- 9.Github link

# Problem statement

- A portfolio biodata website helps present personal, educational, and professional details in a structured and professional way.
- Biodata or resume is not enough to demonstrate an individual's technical skills and achievements

# Project overview

- This project is a portfolio biodata website developed using Html and Css
- It highlights the user's personal details, education, skill, and project in a well organised layout
- That can be shared with employees

# End users

Students/fresh graduates –to showcase their biodata and projects  
Recruiters/employees –to easily review a candidate's profile and technical skills

# Tools and technologies

Html –websitestructure

Css-styling and layoutdesign

Github-version control and hosting

# Features and functionality

Attractive and professional layout

Light weight and fast loading

Simple to update and customise

# Portfolio design and layout

1. \*Visual Identity\*: Reflects personal brand and style.
2. \*Clear Navigation\*: Easy to explore and understand.
3. \*Showcase Best Work\*: Highlight strongest projects.
4. \*Responsiveness\*: Adapts to different devices.

# Result and screenshot

A fully functional portfolio biodata website that displays personal

# Conclusion

The portfolio biodata website successfully provided a modern alternative to traditional resume.

It helps individual showcase their biodata and technical skills  
online in a professional and interactive way

This project demonstrate practical application of Html and Css in  
real-world portfolio development
